Information contained in this specification is proprietary to Metropol Corporation. It shall not be reproduced or disclosed in whole or in part to any party (other than to any individual who has a need to peruse the content of this specification in connection with the purpose for which it is submitted) or used for any purpose other than the purpose for which it is submitted, without the written approval of Metropol Corporation Limited.

@2018 Metropol Corporation Limited

1. Overview

Welcome to the Metropol Credit Reference Bureau API documentation. In here you will find all the information necessary to configure your system to make automated calls to the bureau.

Happy reading.

PS: in case of any hair pulling experiences please find us on Skype or drop us an email.

2. Access & Protocol

The API is only accessed via HTTPS on the hostname `api.metropol.co.ke`. DNS should be configured to resolve the hostname if one is connecting via a custom connection e.g. Point to Point or VPN.

All queries are performed by executing an HTTP POST, GET or PUT depending on the type of query to the given hostname. Unless specified, for all report types the query body must be in JavaScript Object Notation (JSON). In addition, also all responses from the API are in JSON.

The MCRB API uses the HTTP protocol to process calls. The API server responds to all queries with JSON objects unless specified otherwise.

3. Testing Tools

To test API calls, you can use your preferred development language but for most languages, this takes a tad longer when your only aim is to test the calls and responses. For this we recommend using the following tools:

- curl – A UNIX CLI utility
- postman – a Google Chromes extension
- HTTPie – A python curl replacement (check GitHub for documentation)

Client Posts Query

```
$ curl -x POST <OPTIONS> https://api.metropol.co.ke:<portnumber>/<api-version-number>/<end-point>
```

Metropol analytics server returns data in json format

```
{  
  "parameter 1": "value 1",  
  "parameter 2": "value 2"  
}
```

4. API

4.1 API Service Endpoints

A valid call to the API has the URL root, port, version number and endpoint. When starting development, always contact Metropol CRB to get the latest Version number of the URL.

Root URL: <https://api.metropol.co.ke>

Full URL: <https://api.metropol.co.ke:<port-number>/<end-point>>

1. Verify an Identity Number/Document:
endpoint: [/identity/verify](#)
2. Fetch all noncredit information available in the bureau for a given ID
endpoint: [/identity/scrub](#)
3. Fetch all delinquency status for an ID. Current & Past
endpoint: [/delinquency/status](#)
4. Fetch a consumer credit score for an ID
endpoint: [/score/consumer](#)
5. Fetch an Identity's credit report in PDF
endpoint: [/report/pdf](#)
6. Fetch an identity's credit report in JSON
endpoint: [/report/json](#)
7. Fetch a credit information for an ID
endpoint: [/report/credit_info](#)
8. Fetch enhanced credit information for an ID
endpoint: [/report/credit_info_enhanced](#)

NOTE: API testbed is available with all the above endpoints. Contact Metropol IT to get which version.

4.2 API Headers

Each API call must include 4 headers:

9. "Content-Type":"application/json"
10. "X-METROPOL-REST-API-KEY": "DKKEIE3CKGPAIRJVN495JFJAJ"
11. "X-METROPOL-REST-API-HASH":"6b4412c63b19cd86e9939c43d115x961ef4357698da42f984287e6d0029c5671"
4. "X-METROPOL-REST-API-TIMESTAMP": "20140708175839987843"

Content-Type

- ✓ For now, the API only returns data in JSON

X-METROPOL-REST-API-KEY

- ✓ Metropol will assign you this key. It is your Public API key

X-METROPOL-REST-API-HASH

- ✓ This is a SHA-256 blob that you generate using the Private Key that MCRB assigns to you.
- ✓ To generate the hash, concatenate a UTF-8 string of *private_key + json_object + public_key + timestamp* and run your hashing function. The hash should be returned as hexadecimal digits.

X-METROPOL-REST-API-TIMESTAMP

- ✓ The current UTC (Coordinated Universal Time) sent as an integer minimum 20 characters.
- ✓ Format: Year, Month, Day, Hour, Minute, Second, Milliseconds
- ✓ This means that your server/computer has got to have some form of universal time sync as there is a limit of the time difference a client and the API server can have. Currently its 45 seconds.

4.3.API Calls

Note 1:

For all API requests done on the Test Environment, the following Dummy ID's are to be used:

- 550000055
- 660000066
- 770000077
- 880000088
- 990000099

Note 2:

There are no spaces in the JSON object between the KEY:VALUE pair and also no spaces between the different dictionary items e.g.

`{"report_type":1,"identity_number":"880000088","report_type":"001"}`

4.3.1. Report Type 1: [Identity Verification]

Description: This report is used to verify an Identity Number of a given ID Type

HTTP Method: POST

Test URL: https://api.metropol.co.ke:PORT_NUMBER/API_VERSION/identity/verify

Sample Request Header

```
curl -X POST \
  -H "X-METROPOL-REST-API-KEY:XXXXXXXXXXXXXXXXXXXX" \
  -H "X-METROPOL-REST-API-HASH:6b4412....9c5671" \
  -H "X-METROPOL-REST-API-TIMESTAMP:20140708175839987843" \
  -H "Content-Type:application/json" \
  -d '{"report_type":1,\
    "identity_number":"8800000088",\
    "identity_type":"001"}' \
```

JSON Object Request Parameters

Parameter	Type	Optional	Description
report_type	integer	No	The requested report type number
identity_number	string	No	Identity Number to be verified
identity_type	string	No	Type of Identity. Refer to Appendix: Identity Type

Sample JSON Response

```
{
  "api_code":null,
  "api_code_description":null,
  "citizenship":"Kenyan",
  "clan":null,
  "date_of_birth":"1978-01-05",
  "date_of_death":null,
  "date_of_issue":null,
  "dob":"1978-01-05",
  "error":null,
  "error_message":null,
  "ethnic_group":null,
  "family":null,
  "fingerprint":null,
```

```
"first_name":"John",  
"gender":"M",  
"has_error":false,  
"id_number":"880000088",  
"identity_number":"880000088",  
"identity_type":"001",  
"identity_type_id":2,  
"ipaddress":"192.168.20.42",  
"last_name":"Doe",  
"occupation":null,  
"other_name":"Junior",  
"photo":null,  
"pin":null,  
"place_of_birth":null,  
"place_of_death":null,  
"place_of_live":null,  
"regoffice":null,  
"serial_number":"123456789",  
"signature":null,  
"success":true,  
"surname":"DOE",  
"trx_id":"9d540825-8ca8-417d-ac7e-60648070abc6"  
}
```

4.3.2. Report Type 2: [Delinquency Status]

Description:

This report is used to check if an Identity has a current or historical NPA.

HTTP Method: POST

Test URL: https://api.metropol.co.ke:PORT_NUMBER/API_VERSION/delinquency/status

Sample Request Header

```
curl -X POST \
  -H "X-METROPOL-REST-API-KEY:XXXXXXXXXXXXXXXXXXXX" \
  -H "X-METROPOL-REST-API-HASH:6b4412....9c5671" \
  -H "X-METROPOL-REST-API-TIMESTAMP:20140708175839987843" \
  -H "Content-Type:application/json" \
  -d '{"report_type":2,\
    "identity_number":"880000088",\
    "identity_type":"001",\
    "loan_amount":10000}' \
```

JSON Object Request Parameters

Parameter	Type	Optional	Description
report_type	integer	No	The requested report type number
identity_number	string	No	Identity Number to be verified
identity_type	string	No	Type of Identity. Refer to Appendix: Identity Type
loan_amount	integer	No	The amount of loan application amount

Sample JSON Response

```
{
  "api_code":null,
  "api_code_description":null,
  "delinquency_code":"005",
  "delinquency_summary":"Historical delinquency True",
  "has_error":false,
  "identity_number":"880000088",
  "identity_type":"001",
  "loan_amount":2000,
  "trx_id":"e9e0991e-d35c-4884-a793-dadf2a52cf41"
}
```

4.3.3. Report Type 3: [Metro/Mobile Score]

Description: This report is used to fetch Metro Score (Credit Score) or Mobile score for the specified identity in the request. To fetch Metro score, mobile_score parameter should be set to false or alternatively omitted. To fetch Mobile score mobile_score parameter should be set to true.

HTTP Method: POST

Test URL: https://api.metropol.co.ke:PORT_NUMBER/API_VERSION/score/consumer

Sample Request Header

```
curl -X POST \
  -H "X-METROPOL-REST-API-KEY:XXXXXXXXXXXXXXXXXXXX" \
  -H "X-METROPOL-REST-API-HASH:6b4412....9c5671" \
  -H "X-METROPOL-REST-API-TIMESTAMP:20140708175839987843" \
  -H "Content-Type:application/json" \
  -d '{"report_type":3,"identity_number":"880000088", "identity_type":"001" ,
  "mobile_score":false}' \
```

JSON Object Request Parameters

Parameter	Type	Optional	Description
report_type	integer	No	The requested report type number
identity_number	string	No	Identity Number to be verified
identity_type	string	No	Type of Identity. <i>Refer to Appendix: Identity Type</i>
mobile_score	boolean	Yes	If set to true, Mobile score is returned. If set to false or if it is not provided, API will return Metro Score

Sample JSON Response

```
{
  "has_error":false,
  "api_code":null,
  "api_code_description":null,
  "identity_number":"880000088",
  "identity_type":"001",
  "credit_score":"567",
  "category":null,
  "as_at": "2019-10-08",
}
```

4.3.4. Report Type 4: [PDF Report]

Description: This report is used to fetch the full Credit report in a binary PDF format.

HTTP Method: POST

Test URL: https://api.metropol.co.ke:PORT_NUMBER/API_VERSION/report/pdf

Sample Request Header

```
curl -X POST \
  -H "X-METROPOL-REST-API-KEY:XXXXXXXXXXXXXXXXXXXX" \
  -H "X-METROPOL-REST-API-HASH:6b4412....9c5671" \
  -H "X-METROPOL-REST-API-TIMESTAMP:20140708175839987843" \
  -H "Content-Type:application/json" \
  -d '{"report_type":4,\
    "identity_number":"880000088",\
    "identity_type":"001",\
    "loan_amount":2000,\
    "report_reason":1}' \
```

JSON Object Request Parameters

Parameter	Type	Optional	Description
report_type	integer	No	The requested report type number
identity_number	string	No	Identity Number to be verified
loan_amount	integer	No	The amount of loan application amount
identity_type	string	No	Type of Identity. <i>Refer to Appendix: Identity Type</i>
Report_reason	integer	No	The reason for the Credit Report generation

Sample JSON Response

```
{
  "has_error":false,
  "api_code":null,
  "api_code_description":null,
  "trx_id":"6579d9a5-368f-4c8a-9125-db5a7d24f0b6",
  "identity_number":12345678,
  "identity_type":"001",
  "reference_number":"3484BDKG394942",
  "encoding":"base64",
  "report":"Binary encoded data",
}
```

```

    "report_reason":1
  }

```

4.3.5. Report Type 5: [JSON Report]

Description: This report is used to fetch the Credit report in a JSON format.

HTTP Method: POST

Test URL: https://api.metropol.co.ke:PORT_NUMBER/API_VERSION/report/json

Sample Request Header

```

curl -X POST \
  -H "X-METROPOL-REST-API-KEY:XXXXXXXXXXXXXXXXXXXX" \
  -H "X-METROPOL-REST-API-HASH:6b4412....9c5671" \
  -H "X-METROPOL-REST-API-TIMESTAMP:20140708175839987843" \
  -H "Content-Type:application/json" \
  -d '{"report_type":5,\
    "identity_number":"880000088",\
    "identity_type":"001",\
    "loan_amount":2000,\
    "report_reason":1}' \

```

JSON Object Request Parameters

Parameter	Type	Optional	Description
report_type	integer	No	The requested report type number
identity_number	string	No	Identity Number to be verified
loan_amount	integer	No	The amount of loan application amount
identity_type	string	No	Type of Identity. <i>Refer to Appendix: Identity Type</i>
Report_reason	integer	No	The reason for the Credit Report generation

Sample JSON Response

```

{
  "account_info":[
    {
      "account_number":"DM_8820191767488",

}
```

4.3.6. Report Type 6: [Identity Scrub]

Description: This report is used to fetches non account information available for a given Identity

HTTP Method: POST

Test URL: https://api.metropol.co.ke:PORT_NUMBER/API_VERSION/identity/scrub

Sample Request Header

```
curl -X POST \
  -H "X-METROPOL-REST-API-KEY:XXXXXXXXXXXXXXXXXXXX" \
  -H "X-METROPOL-REST-API-HASH:6b4412....9c5671" \
  -H "X-METROPOL-REST-API-TIMESTAMP:20140708175839987843" \

    "employer_name":"Testing Metropol"
  }
]
}
```

4.3.7. Report Type 8: [Credit Info]

Description: This report is used to fetch the Credit Information for a given identity number

HTTP Method: POST

Test URL: https://api.metropol.co.ke:PORT_NUMBER/API_VERSION/report/credit_info

Sample Request Header

```
curl -X POST \
  -H "X-METROPOL-REST-API-KEY:XXXXXXXXXXXXXXXXXXXX" \
  -H "X-METROPOL-REST-API-HASH:6b4412....9c5671" \
  -H "X-METROPOL-REST-API-TIMESTAMP:20140708175839987843" \
  -H "Content-Type:application/json" \
  -d '{"report_type":8,\
    "identity_number":"880000088",\
    "identity_type":"001",\
    "loan_amount":2000,\
    "report_reason":1}' \
```

JSON Object Request Parameters

Parameter	Type	Optional	Description
report_type	integer	No	The requested report type number
identity_number	string	No	Identity Number to be verified
identity_type	string	No	Type of Identity. Refer to Appendix: Identity Type
loan_amount	integer	No	The amount of loan application amount
Report_reason	integer	No	The reason for the Credit Report Generation

Sample JSON Response

```
{
  "account_info": [
    {
      "account_number": "DM_8820191767488",
      "account_status": "Fully Settled",

4.3.8. Report type 10: [Enhanced Credit Info]

Description: This report is used to fetch the Credit Information for a given identity including guarantors and stakeholder details

Note:

- *Guarantors: entities that have guaranteed the subject*
- *Stakeholders: entities that have stakes in the subject entity*

HTTP Method: POST

Test URL: https://api.metropol.co.ke:PORT_NUMBER/API_VERSION/report/credit_info_enhanced

Sample Request Header

```
curl -X POST \
  -H "X-METROPOL-REST-API-KEY:XXXXXXXXXXXXXXXXXXXX" \
  -H "X-METROPOL-REST-API-HASH:6b4412....9c5671" \
  -H "X-METROPOL-REST-API-TIMESTAMP:20140708175839987843" \
  -H "Content-Type:application/json" \
  -d '{"report_type":10,\
    "application_ref_no":" 45555", \
    "identity_number":"880000088",\
    "identity_type":"001",\
    "loan_amount":2000, \
    "report_reason":1}' \
```

JSON Object Request Parameters

Parameter	Type	Optional	Description
report_type	integer	No	The requested report type number
Application_ref_no	string	Yes	Credit Application Reference number (Optional)
identity_number	string	No	Identity Number to be verified
identity_type	string	No	Type of Identity. <i>Refer to Appendix: Identity Type</i>
loan_amount	integer	No	The amount of loan application amount
Report_reason	integer	No	The reason for the Credit Report Generation

Sample JSON Response

```

4.3.11. Report Type 13: [Minified Credit Info]

Description: This report is fetches a summary of credit information for a given identity number.

HTTP Method: POST

Test URL: https://api.metropol.co.ke:PORT_NUMBER/API_VERSION/report/credit_info

Sample Request Header

```
curl -X POST \
  -H "X-METROPOL-REST-API-KEY:XXXXXXXXXXXXXXXXXXXX" \
  -H "X-METROPOL-REST-API-HASH:6b4412....9c5671" \
  -H "X-METROPOL-REST-API-TIMESTAMP:20140708175839987843" \
  -H "Content-Type:application/json" \
  -d '{"report_type":13,\
    "identity_number":"880000088",\
    "identity_type":"001",\
    "loan_amount":2000,\
    "report_reason":1}' \
```

JSON Object Request Parameters

Parameter	Type	Optional	Description
report_type	integer	No	The requested report type number
identity_number	string	No	Identity Number to be verified
identity_type	string	No	Type of Identity. Refer to Appendix: Identity Type
loan_amount	integer	No	The amount of loan application amount
Report_reason	integer	No	The reason for the Credit Report Generation

Sample JSON Response

```
{
  "has_error":false,
  "days_in_arrears":150,
  "identity_number":"80000088",
  "negative_his_indicator":0,
  "npl_flag":1,

4.3.13. Report Type 16: [Credit Accounts Summary Report]

Description: This report gives a summary of credit information in terms of total number of:

- mobile loan accounts,
- generic loan accounts (Non-mobile accounts),
- monthly installments for active generic loans
- accounts in arrears
- accounts in NPL,.

HTTP Method: POST

Test URL: https://api.metropol.co.ke:PORT_NUMBER/API_VERSION/report/credit_info

Sample Request Header

```
curl -X POST \
  -H "X-METROPOL-REST-API-KEY:XXXXXXXXXXXXXXXXXXXX" \
  -H "X-METROPOL-REST-API-HASH:6b4412....9c5671" \
  -H "X-METROPOL-REST-API-TIMESTAMP:20140708175839987843" \
  -H "Content-Type:application/json" \
  -d '{"report_type":16,\
    "identity_number":"880000088",\
    "identity_type":"001",\
    "loan_amount":2000,\
    "report_reason":1}' \
```

JSON Object Request Parameters

Parameter	Type	Optional	Description
report_type	integer	No	The requested report type number
identity_number	string	No	Identity Number to be verified
identity_type	string	No	Type of Identity. <i>Refer to Appendix: Identity Type</i>
loan_amount	integer	No	The amount of loan application amount
Report_reason	integer	No	The reason for the Credit Report Generation

Sample JSON Response

```
{
  "api_code": null,
  "api_code_description": null,
  "credit_info": {
    "average_principal_mobile_loans_active": 100.0,
    "average_principal_mobile_loans_closed": 0.0,
    "generic_account_count": 0,
    "generic_account_count_closed": 0,
    "generic_account_in_arrears_count": 0,
    "generic_account_npa_count": 0,
    "mobile_account_count_active": 1,

    "mobile_account_in_arrears_count": 0,
    "mobile_account_npa_count": 1,
    "total_monthly_instalment_generic": 0.0
  },
  "has_error": false,
  "identity_number": "880000088",
  "identity_type": "001",
  "phone_number": [
    "254712345678"
  ],
  "reported_name": [
    "PETER MARANGI",
    "MARANGI PETER"
  ],
  "verified_name": {
    "first_name": null,
    "other_name": null,
    "surname": null
  }
}
```

4.3.14. Report type 22: [Accounts Info]

Description: This report shows Account Information history within a period of 12 months on the following fields:

1. account_status
2. days_in_arrears
3. last_payment_amount
4. last_payment_date
5. overdue_balance
6. and general credit_score

Where there is no at least 3 months recent history, it returns an empty tag on account history

HTTP Method: POST

Test URL:

https://api.metropol.co.ke:PORT_NUMBER/API_VERSION/report/credit_info

Sample Request Header

```
curl -X POST \
  -H "X-METROPOL-REST-API-KEY:XXXXXXXXXXXXXXXXXXXX" \
  -H "X-METROPOL-REST-API-HASH:6b4412....9c5671" \
  -H "X-METROPOL-REST-API-TIMESTAMP:20140708175839987843" \
  -H "Content-Type:application/json" \
  -d '{"report_type":22,\
    "identity_number":"8800000088",\
    "identity_type":"001",\
    "loan_amount":2000,\
    "report_reason":1}' \
```

JSON Object Request Parameters

Parameter	Type	Optional	Description
report_type	integer	No	The requested
Application_ref_no	string	Yes	Credit Applicat
identity_number	string	No	Identity Numb
identity_type	string	No	Type of Identit
loan_amount	integer	No	The amount of
Report_reason	integer	No	The reason for

Sample JSON Response

```

4.3.15. API Health Check

Description: This endpoint is for checking availability of MCRB API service. The endpoint does not require any parameter.

HTTP Method: GET

Test URL: https://api.metropol.co.ke:PORT_NUMBER/API_VERSION/health

Response Returned:

The API will return a JSON as shown below:

```
{  
  "api_code": "E200",  
  "api_code_description": "API SERVICES AVAILABLE",  
  "has_error": false  
}
```

5. API Codes

The MCRB API returns standard HTTP status codes with each call. In all API processed queries, each result returns at least the following fields:

- has_error
- api_code
- api_code_description

Additional Information:

- When there is an error, the “has_error = True” with an appropriate “api_code” and “api_code_description” will be returned with a relevant HTTP status code e.g. 400, 402, 500 etc.
- When there is no error, the result will be “has_error=False” and the “api_code” and “api_code_description” will be null.

5.1. Report Types

MCRB API: Report Type		
Report Type	Description	Detailed Description
1	Identity Verification	Verify an Identity Number of a given ID Type
2	Delinquency Report	Check if an Identity has a current or historical NPA
3	Check Credit Score	Fetch Credit score of a given Identity
4	PDF Credit Report	Fetch full credit report for a given Identity
5	JSON Credit Report	Fetch full credit report for a given Identity.
6	Identity Scrub	Get non account information available for a given Identity
8	Credit Info	Get all Credit Information for a given identity
10	Enhanced Credit Info	Get all Credit Information for a given identity with guarantors and stakeholder details
11	Credit Info with Income Estimation	Get all Credit Information for a given identity plus income estimation
12	Full Enhanced Credit Info	Get all Credit Information, Identity Verification, Identity Scrub, last 12 Months Metro Score and last 12 months Payment Performance Index (PPI) for a given identity.
13	Minified Credit Info	Get a minified summary of credit information for a given identity number.
14	Full JSON Credit Report	Full Credit report in a JSON format. It includes, Identity Verification, Identity Scrub, Credit Info, Stakeholder Info and Guarantor Info
16	Credit info	Credit information summary on mobile accounts and generic loans

5.2. Report Reasons

MCRB API: Report Reason	
Code	Description
1	New credit application
2	Review of existing credit
3	Verify customer details
4	Direct customer request

5.3. MCRB Identity Types

MCRB API: Identity Type	
Code	Description
001	National ID
002	Passport
003	Service ID
004	Alien Registration
005	Company/Business Registration

5.4. Delinquency Codes

MCRB API: Delinquency Codes		
Delinquency Code	Report Name	Report Description
001	Identity not found	ID number not found in the database
002	No account information	ID number has been found but it has no credit information
003	No delinquency	ID Number has credit info with No NPA
004	Currently delinquent True	ID Number has credit information with at least one current NPA
005	Historical delinquency True	ID Number has credit information with at least one Historical NPA

5.5. MCRB Lender Sector Codes

MCRB API: Lender Sector	
Code	Description
sector_bank	Banking Industry
sector_mfb	Micro Finance Banks
sector_mfi	Micro Finance Institutions
sector_sacco	Sacco Organizations
sector_other	Other Industries (Sectors)

5.6. Account Product Types

MCRB API: Account Product Type	
Code	Description
1	Unknown
2	Current Account
3	Loan Account
4	Credit Card
5	Line of Credit
6	Revolving Credit
7	Overdraft
8	Credit Card
9	Business Working Capital
10	Business Expansion Loan
11	Mortgage
12	Asset Finance Loan
13	Trade Finance Facility
14	Personal Loan
18	Mobile Banking Loan
19	Other

Note: Product Codes 15, 16, 17 are missing by design

5.7. Account Status Codes

MCRB API: Account Status Type	
Code	Description
-	Unknown
A	Closed
B	Dormant
C	Performing
D	Non-Performing
E	Write-Off
F	Legal
G	Collection
H	Active
I	Terms Extended
J	Early Settlement
K	Fully Settled
L	Revoked
M	Suspended
P	Paid Up
Q	Disability, Deceased, Insurance Claim
R	Deferred
N	Not Updated

5.8. API Response Codes

MCRB API: Response Codes		
Response Code	Error Description	Error Detail
E001	Please contact MCRB API Administrator	Internal error occurred
E002	Empty API Key	API call doesn't include the API key
E003	Not Authorized	API key is not authorized to access a service
E004	Invalid public key	Public key has expired or has been flagged as invalid
E005	Invalid Content Type	API call has invalid content type
E006	Invalid JSON object	API call has invalid JSON object
E007	Missing parameter: report_type	report_type key hasn't been passed
E008	Missing parameter: identity_number	identity_number key hasn't been passed
E009	Missing parameter: identity_type	identity_type key hasn't been passed

E010	Empty report_type	report_type value hasn't been passed
E011	Invalid report type	Invalid report_type value has been passed
E012	Empty identity_number	identity_number value hasn't been passed
E013	Empty identity_type	identity_type value hasn't been passed
E014	Invalid identity_type	Invalid identity_type value has been passed
E015	Invalid query for selected report_type	Invalid combination of parameters for a type of report
E016	Service not yet available	Service not available for public use
E017	Identity not found	ID Number could not be found in the database
E018	ID Number passed not among test set	During testing, there are specific IDs to be used
E019	Restricted identity_type	Queried an indentity type that isn't accessible yet
E020	Missing parameter: loan_amount	loan_amount key hasn't been passed
E021	Empty loan_amount	loan_amount value hasn't been passed
E022	Invalid loan_amount	Invalid loan_amount value has been passed
E023	Empty Time Stamp	API call header doesn't include a Time Stamp
E024	Invalid Time Stamp	API call header has an invalid Time Stamp
E025	Time Mismatch	Time delay between query generation and API receiving the request
E026	Empty Hash	API call header doesn't include a Hash
E027	Hash Mismatch	Hash sent in API call doesn't match with Hash generated by the server
E028	Account setup incomplete	API Account hasn't been fully configured or activated. Contact MCRB
E029	Unauthorized report	API account doesn't have access to the report specified in the query
E030	Invalid private key	Private key has been invalidated. Contact MCRB
E031	Missing Parameter: report_reason	API call doesn't include a Reason for accessing the report
E032	Invalid report_reason	Invalid value for report reason passed
E033	Unknown report_reason code	Report reason provided not among allowed codes
E409	Duplicate Request	Similar request already received in the last 60 seconds

6. Document Version

Version	Date	Comment
1.0	March 2nd 2014	Initial API document
1.1	April 24th 2014	Added Identity Verification
1.2	June 16th 2014	Added API codes & changed test port
1.3	June 20th 2014	Corrected entries in report type
1.4	June 24 th 2014	Added fields in report 5: no. of. Bounced cheques, enquiries & formatted the no of credit applications different
1.5	June 26 th 2014	Added delinquency code to JSON Report Renamed "error_code" to "api_code" & "error_summary" to "api_code_description" Made the API Codes sequential
1.6	July 2 nd 2014	Added Report Type 6. Identity Scrub
2.0	July 6 th 2014	Added Private Key & Hash Header, API Versioning & URL layout
2.1	July 22 nd 2014	Clarification of hash string Encoding & JSON object format, Changing of some key values in JSON report from numeric to string e.g. 3, 6, 12 to last_3_months, last_6_months etc
2.2	July 30 th 2014	Changed keys for lender sector section from numeric to string i.e 1,2,3 etc to sector_bank, sector_mfb etc
2.3	August 27 th 2014	Added 'is_your_account' in the account_info block in json report Sanitized the product_type codes
2.4	March 11 th 2015	Corrected UTC timestamp call and introduced trx_id as a response to all calls
2.5	June 12 th 2015	Added report type 8 which is a credit information API which will eventually replace the soon to be deprecated Full JSON API.
2.6	May 20 th 2016	Added enhanced report type 10
2.7	July 20 th 2016	Added account status code field in enhanced report
2.8	September 8 th , 2016	Modified report type 10 to cater for application_ref_number request
2.9	January 10, 2017	Added account status and highest arrears days in report type 8
3.0	May 29, 2018	Added Dummy Test ID's as well as loan_amount on Report PDF
3.1	Nov 26, 2018	Added Report Types 12, 13 and 14
3.2	January 18 2019	Added Payment Performance Index (PPI) to Report Type 5 Added PPI rank to report type 12
3.3	September 4, 2019	Added Report Type 16 Added Reported Names and Verified names to Report Type 5
3.4	October 7 2019	Added phone_number to report type 11
3.5	January 17 2020	Added restriction to prevent processing of a similar request received less than a minute from the first request.

3.6	November 27 2020	Added Mobile Score to report type 3 Added Health check endpoint.
3.7	April 22 2022	Added report type 22
3.8	July 19th 2022	Enhanced report type 22 To only show recent History and return empty tag where no recent history within three month is found
